## The Danger Of Inflation

OF THE MANY EVILS which result from war, inflation is one of those which is most injurious to the welfare of a nation. The unusual economic conditions created by war tend to set up that dangerous spiral of rising prices and wages which ultimately ends in complete financial disaster. Almost every country, including Canada, suffered from inflation during the last war, and the lessons learned then have resulted in widespread efforts to avoid this condition again. In Canada, Britain, and the United States, measures have been taken to control prices and wages and to prevent unwarranted increases in either of these items.

## Public Support Has Been Given

Great difficulties stand in the way of exercising such extensive control, and all the nations which have undertaken such schemes have not met with complete success. They have, however, maintained stability than those nations which did not attempt to control the situation. In Canada, the public has been aware, since the beginning of the war, of the dangers of inflation, and there has been splendid co-operation on the part of the people in avoiding this danger. For some time now, there has been an extensive system of government control, aimed at preventing inflation, but it is useless for anyone to expect a quick return to normal conditions. Patience will be needed, on the part of the public in respect to spending their war savings, and to the lifting of some of the present restrictions, and the average Canadian will no doubt continue to see the wisdom of continued caution in these matters.

## People Must Be Patient

Many of the controls which have been enforced in order to ensure economic stability are, of necessity, unpleasant, and as world conditions generally become more normal, there is a tendency on the part of people to believe that it should no longer be necessary to continue these restrictions. It must be kept in mind, however, that the immediate post-war years may be as critical, in many ways, as the past five years have been, and that it is useless for anyone to expect a quick return to normal conditions. Patience will be needed, on the part of the public in respect to spending their war savings, and to the lifting of some of the present restrictions, and the average Canadian will no doubt continue to see the wisdom of continued caution in these matters.

## It's foolish to keep on "dosing"!

Why go on dosing another day with harsh, unpleasant purgatives? Discover, as thousands have, that KELLOGG'S ALL-BRAN is a far better, far gentler way to help correct constipation due to lack of dietary "bulk". KELLOGG'S ALL-BRAN really "gets at this common cause of constipation—supplies "bulk" needed for easy, natural elimination. If it's your trouble—try eating an ounce of ALL-BRAN daily, or several ALL-BRAN muffins. Drink plenty of water. Get KELLOGG'S ALL-BRAN at your grocer's, a convenient "one-stop" made by Kellogg's in London, Canada.

## Will Need Horses

Canada Will Play Large Part In Supplying Europe

Canadian breeding stock may play a large part in re-building the livestock herds of Europe when the war is over. Particularly in the restoration of farm power, the horse will be required, and some idea of the demand for horses may be gained from the estimates of the declining numbers of horses in the various countries since the war began. It is estimated that the numbers of horses in Britain, Holland, and Belgium have been reduced by half, in Russia by one-third, and that only one-third of the original numbers of horses has been left in Poland, Czechoslovakia, Jugoslavia, and Greece. Germany, by plundering the other nations, is believed to have many horses, if not more, than when the war began. However, say the authorities, the task of supplying farm power to help in the restoration of agriculture in the devastated countries is going to be a tremendous one and is expected to result in a strong demand for Canadian horses for some time to come.

## IN THE MAJORITY

There are 3,118 Smiths in the Canadian Army. Three hundred and sixty-two of these are William Smiths, of whom 44 come from Toronto. The Browns number 3,071, while the Joneses are only 1,063. It will be no difficulty for the Smiths and the Browns to keep up with the Joneses in this case.

## Price Control And Rationing Information

Q.—My storekeeper insists that I purchase a box of apples before he will sell me a box of pears. Is he allowed to do this?

A.—Conditional sales are strictly forbidden by Wartime Prices and Trade Board Order No. 302, and it is therefore illegal for your grocer to insist that you buy one kind of food with another. This should be reported to the nearest Wartime Prices and Trade Board office.

Q.—Would you please tell me if the coupon value for the purchase of brown sugar is the same as for white sugar?

A.—Yes, the coupon value is exactly the same for brown sugar as for white sugar, the value being one pound per valid coupon.

Q.—Thanksgiving will soon be here and I am interested in cranberry sauce for the Thanksgiving turkey. Has cranberry sauce been again placed on the ration list?

A.—Cranberry sauce has again been placed on the ration list and each preserves coupon is worth twelve ounces. Fresh cranberries have never been placed on the ration list.

Q.—In order to start a new business it is necessary to secure a permit and license from the Business Permits Section of the Wartime Prices and Trade Board?

A.—Yes, any individual must first apply to the Wartime Prices for a permit and license to operate a new business. This also applies to anyone opening a new business in his own home.

Q.—When will the next ration book be issued?

A.—The next ration book will be issued to the public during the week of October 14 to 21.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book. The book in which you keep track of your selling prices" mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

## Looking For Markets

China's Tea Trade Will Likely Revive After The War

The Chinese News Service says tea exports are looking forward optimistically to the revival of China's tea trade after the war.

China has wide tea-producing areas and the production of tea has not been severely hit by the war.

They believe that Chinese tea will enjoy a booming market three or four years after the war when China's exports are reopened.

## All Dressed Up With Plenty To Do

Many sets in India forbid the killing of animals.

The plan in operation would revolutionize life in the remotest areas of Australia, New Letter.

Mecca of the furloughed service girl is the beautiful lake centre recently opened at Banff, Alberta, in the heart of the Canadian Rockies. Already scores of Army girls stationed within travelling distance have visited the centre and pronounced it the "finest ever". Operated under the supervision of the W.C.A.C., the centre offers a wide variety of holiday recreations. Riding stables, tennis courts, golf links and the famous sulphur springs are all within easy walking distance, while nearby are the clear and sparkling waters of Lake Louise and Lake Moraine. Approximately 70 service women a week have been vacationing at this new centre.

Personalities of the C.W.A.C. Overseas, and wife of Capt. C. E. Campbell, of Edmonton, Alta.

has known war experiences which make her the envy of all the C.W.A.C.s in her division. She is the daughter of a vison to her enlistment into the C.W.A.C. In 1942, Brenda was a member of the British Auxiliary Territorial Service. In her work as an ack-ack battery plotter, she was successful in bringing down two German planes. One of these, a Ju-88, she watched fall into the sea.

HOME AGAIN—Enlistment in the Canadian Women's Army Corps spelled a return home for Pte. Lucy McCarthy, of Winnipeg. In 1929, when Lucy was just six years old, her family moved into Fort Osborne barracks, Winnipeg, where Lucy's father, then Sgt. Bywater (Mac) McCarthy was serving with the Princess Patricia's Canadian Light Infantry (P.C.L.I.). She lived in the garrison for 10 years before her father was honorably discharged from military service. Now she is back at Fort Osborne, this time as a resident of "Camp-Ville".

Canadian Army photo.

This is Lance Corporal Jacqueline (Butch) Irvine, of Rouleau, Sask., member of the Canadian Women's Army Corps. "I love driving, especially tractors, but you can't work on a tractor with this swell new outfit, so I'll settle for my half-ton truck," said the Corporal as she posed for this picture in the new outfit issued to C.W.A.C. vehicle drivers. Jacqueline drives a panel truck for the Army. Dressed in the regulation khaki shirt, and brown tie, the familiar cap styled after the C.W.A.C. vehicle drivers, she is ready to start her day's work at Army Headquarters in Regina.

Smith: "So you're setting your boy up in the bakery business?" Jones: "Yes, he's as keen on dough and such a swell baker that I'm sure he'll rise in the business."

A slightly baffled housewife got on the bus after a city-wide bargain day, turned to her neighbor, and said: "Well, I saved a lot of money today."

"Really? What did you get?" "Nothing—I couldn't get wait-on."

Teacher: "And so you see, children, love is the one thing you can give in abundance and still have plenty left."

Jimmy: "How about measles?" Lady: "Did you notice the pile of wood in the yard?"

Tramp: "Yes, lady, I see it."

Tramp: "You should mind your grammar, and say you saw it."

Tramp: "Lady, you saw me see it, but you ain't seen me see it."

## Can Get Good Stock Channel Island Farmers May Have To Import Dairy Cattle

The Channel Islands are famous for their dairy cattle, particularly Jerseys and Guernseys. That has been the breeding ground of pure-bred stock for centuries. Every Jersey and Guernsey outside the Channel Islands has an ancestry that can be traced back to there.

The inhabitants of the Channel Islands almost make pets of their cattle. When the Germans invaded the islands many of the small farmers shot their cows rather than let them fall into enemy hands. The Nazis carried away thousands so that their milk and butter might feed their own people.

Recently, a number of refugees from the island of Alderney met in London to consider what they can do to restore their herds. In a letter to the Times, Henry Gawn, chairman of the Alderney relief organization stated that restoration of the island herds, if at all possible, is essential as they attain their full perfection in their native island alone.

Future generations, he contends, should be expected to breed for their peculiar characteristics are to be maintained and improved. There was no tuberculosis among the island herds and surgical tuberculosis of bovine origin does not exist unless contracted elsewhere.

The people of the Channel Islands will not rely on the idea of importing stock from Britain, or from Canada, and the United States, but if they discover that their herds have been so thinned that they need outside help, they will find that outside breeders will not only be glad to help them, but that the stock is absolutely pedigreed.—St. Thomas Times-Journal.

## Australia Has Plans Scheme Would Give The Commonwealth A Great Air Base

The Commonwealth government is planning a post-war airline scheme to bring any place in Australia within 24 hours' travel of any other place.

It has a plan to build a series of links by truck services, each serving a 300-mile radius by air or surface transport.

Airbuses are available, the R.A.A.F. will provide the trained personnel and only 18 modern air liners will be required—not many more than are already in operation.

The plan in operation would revolutionize life in the remotest areas of Australia, New Letter.

## Should Come First

British War Brides Deserve The Warmest Welcome From Canada

British war brides of Canadian soldiers have been arriving in Canada for the past year or two and many more will come.

No class of immigrant should be more warmly welcomed than the representatives of the gallant British people who endured and withstood the worst that a frenzied Nazi could send them in the height of German success.

It is right to provide a haven in this country for refugees from Central Europe, persecuted by the Nazis, but our own kith and kin who were first the victims and then the Canadian soldiers constitute a first lien on our hospitality.—Calgary Herald.

## Saving In Space

Square Milk Bottles Are Used In Many United States Cities

After a year's trial, the innovation of square milk bottles in quarts and half-pints at Cedar Rapids, Iowa, and other cities in the United States, has proved a success. Because of the change from round milk bottles was the desire to conserve cold storage space and to increase truck loads. It was found that about 45 per cent. more milk could be stored and considerably more milk be carried in trucks by using new cases, more compact and lighter in make than the conventional type. These cases require about one-third less space than the truck and save much work and time to the driver. Grocers and retailers say that they can put 20 square quarts on a refrigerator shelf that held only 25 round bottles.

## OUR COMPLETE SHORT STORY—

### Birds Of Prey

By KATHRYN M. KEELEY

McClure Newspaper Syndicate

Young Mrs. Carroll dumped the green cooking apples she had just brought from the corner grocery into the sink and splash water on them preparatory to making a pie. It was nearly eleven o'clock, and soon Mrs. Murphy, her neighbor, would squish through the barren hallway to knock for her morning call. Mrs. Murphy considered herself an oracle on love and life, marriage and babies, and she had taken Ellen Carroll under her protective wing from the time Ellen was a bride. Not that Ellen minded, for Mrs. Murphy was a good cook, and she dropped many a valuable hint. In two years Jim Carroll had waxed broad and genial from just such hints.

Mrs. Murphy slammed the kitchen door with a resounding bang, her face red from the icy wind. Did you remember to bring the suit? she panted, her voice still holding its County Court brioche after all these years.

Ellen bent to pull off her friends' snowy rubbers. "Shure," she mumbled. "I forgot all about it. An' what will ye wantin' suit for?" Mrs. Murphy smiled down at the red-brown head fondly. "To feed the birds, to be sure."

Ellen sobered but said lightly. "I thought maybe you meant it. I thought you heard the machine shop is going out on a strike. I'll take a long while to get it settled Jim says."

Mrs. Murphy chuckled sympathetically. "Too bad, too bad. Not much saved, dearie?"

"A little. But not enough for a long stretch."

Ellen stirred flour into a yellow bowl. Mrs. Murphy watching with mute approval. Not until the shaker was blended into little flakes did she say earnestly. "You could have more, Ellen, if you weren't feedin' all the tramps in the city."

Ellen's eyes grew big. "You're astonishment. But they're hungry. I never give them a crumb. It's like you and your birds. I just give them crumbs."

"Birds?" Mrs. Murphy snorted. "Birds of prey, they are. Some day I'll come here to find your head bashed in from one of those birds of yours. It's in the papers every day. Inadvertently, Ellen shuddered. "I won't let anyone in. I just put hot soup and sandwiches on the steps. And then slowly, 'til all of destruction your faith in human nature is gone. I can't share what little you have."

"Well, I'm warnin' you," Mrs. Murphy rose abruptly. "I must be leavin'. Big John will be home for lunch. Don't forget to sprinkle some milk on the top crust to make it brown."

Afterward, Ellen pored the apples thoughtfully. How long would the strike last? Just when would they be getting on their feet too? Her payment on this white clapboard bungalow had been made. She and Jim had budgeted so carefully. Tears blurred her eyes. She shook them furiously away.

The pie was completed when the front door bell rang. That might be

## Nervous, Restless

On "CERTAIN DAYS" of the Month! If functional periodic disturbance makes you feel nervous, cranky, high-strung, tired, weak and out of sorts, Lydia E. Pinkham's Compound is just the thing. It's a natural blood purifier, a powerful tonic, and a reliable remedy for all the troubles that come from a weak, impure blood. It's the only medicine that's been in continuous use for over 50 years. It's the only medicine that's been in continuous use for over 50 years. It's the only medicine that's been in continuous use for over 50 years.

LYDIA E. PINKHAM'S COMPOUND

## Damage Was Slight

Paris Suffered Much Less Than London From Air Bombing

More fortunate than London, the city of Paris was spared the fate of heavy damage from the air.

British, Canadian and United States bombers have flown over and around it hundreds of times but held their blows for military targets.

Bomb damage was confined almost entirely to the suburban industrial districts at a minimum cost to civilians. The big railroad yards, the vast Renault motor works and the subsidiary plants were the scenes of greatest destruction.

Two of the best examples of the devastation caused by the Allied bombers—an indication of how large sections of Germany must now look—are the Renault works on the mammoth Villeneuve-St. Georges southwestern edge of Paris and the freight yards outside Vincennes.

The Renault factory is a mass of wrecked and burned out buildings and twisted steel.

A Paris newspaper said the bombing never caused the plant to shut down completely, but "obviously production is greatly reduced."

"It usually was thrown out of gear for two or three days after each big raid," it declared.

Thousands of wrecked railway cars are scattered over the Villeneuve-St. Georges yards, through which the Germans had to move vast quantities of material. One area, three-quarters of a mile square is almost a mass of twisted cars and locomotives and twisted rails.

The heart of Paris around the Eiffel Tower was not touched by any of the terrific buildings suffered any damage.

## Book Of Remembrance

Commemorates Work Of Canadian Engineers Killed In Last War

Grace Melvin, well-known Vancouver artist, has completed a Book of Remembrance for the Military Engineers' Association of Canada, which will shortly be placed in the hands of the association and eventually will find its place in St. Paul's Cathedral, London.

The beautifully bound and illustrated volume contains the names of the 2,004 Canadian engineers who fell in the First Great War.

More than two years Mrs. Melvin, head of the department of design at the Vancouver Art School, has devoted her leisure time to working on the designing, lettering and illuminating of the book. Bound in red English morocco the 40-page volume contains 19 by 14 inch pages.

The front cover a large cross is modelled in relief with lettering and an intricate design stamped in gold on the leather.

Mrs. Melvin, who specializes in illumination design and lettering, was designed by the husband of illuminated address presented by the city of Vancouver to King George VI when Queen Elizabeth was in Vancouver in 1939.

The Book of Remembrance will be placed in a niche in St. Paul's Cathedral, London, as a memorial to the Canadian engineers who died in the war.

It will be one of the duties of the custodian of the Cathedral to inscribe the names of the Canadian engineers who died in the war.

## Has Proved Success

Combined Immunization Against Whooping Cough And Diphtheria Is Advised

Studies show that infants can be immunized successfully against diphtheria and whooping cough at the same time. The Health League of Canada reported, quoting an article by three Illinois investigators in the Journal of the American Medical Association.

"Because diphtheria and whooping cough are most prevalent and serious in the first years of life, a logical that immunization against the two diseases should be attempted at the same time."

The investigators are quoted as saying that the report is based on injections given 600 infants averaging eight months in age. Three doses were given each child. Three-week intervals between doses yielded a higher percentage of immunity responses than dosage one week apart.

Ninety-seven per cent. of the children on the three-week-interval dosage tested immune to diphtheria and 72 per cent. had high immunity tests for whooping cough. After a stimulating dose of pertussis vaccine, the whooping cough percentage rose to 95. Reactions were transient and usually mild.

"The three investigators said that 'Infant so injected during the past five years... is known to have contracted either disease'."

Telegraph and telephone wires strung along highways average 208 pounds per mile.

## Sightseeing In Rome

After fighting through the Sicilian and Italian campaigns, "Steve" Yuremchuk, Endeavor, Sask., says a well earned leave in Rome. He served in England for two and half years.

## Quality You'll Enjoy

## When Children Die

## Extended To Civilians

In Many Cases Negligence Of Parents Is The Cause

The tragic death of children in an English community when a military airplane crashed in their midst aroused widespread pity and sympathy. Ironically, nothing had been said about some 240 children in England and Wales who were choked to death by diphtheria in four weeks ending April 29 last—or the hundreds of other British children who have fallen victims to preventable diseases this year. Are our towns to be confined to those children who die dramatically?

According to statistical reports, there were 120 cases of diphtheria in England and Wales during the four weeks mentioned. About 10 per cent. of diphtheria cases today are fatal. Many of the patients who recover suffer serious complications.

Thus, like falling aircraft engines, missiles, infectious diseases take their toll in dead and maimed. The difference is this: All the valor and skill the armed forces, and all that parents can do, cannot protect all children against the violence of war or accidents associated with war.

But loving parents can and should protect their little ones against preventable diseases for which simple, safe immunization procedures are available.

Our tears for the little children who died and were maimed in the crash of the airplane cannot reach them back. But we can protect children against diseases which kill and maim as surely as surely as violent accidents associated with war. This applies in Canada as well as in the British Isles.

The Postmaster-General Announces Change In Rules For Air Letters

Postmaster-General Mulock has announced that special air letter facilities thus far available only for the forces through use of the armed services blue air letter will be extended to civilians, effective Sept. 11.

Under the new arrangement, civilian air letters may be sent to many commonwealth countries at a special rate of 10 cents.

Post-Mulock says the arrangement "may mark the commencement of a new idea in civilian trans-oceanic air mail communication."

## TOWN AND COUNTRY PERSONALOLOGRAPHS

Mr. and Mrs. Harley Willson and family of Strathmore were Carbon visitors Sunday.

Miss Viola Enthee has been appointed Carbon agent for the Alberta Government. Telephones, and takes over her new appointment on October 1st.

Donnie McLeod visited in Calgary with relatives last week.

Mrs. E. A. Pezon spent last week visiting at East Coulee with Mr. and Mrs. C. Oliphant and family.

Carbon and district schools open on Monday, October 2nd for the fall term.

Mrs. C. A. Cressman was a Calgary visitor this week, going in on Tuesday.

Two deer have been seen frequently just south of town. Apparently the good crops in the district have attracted them to this locality.

Les Goff who resided at Carbon 18 years or more ago, and who has been in the district for the past couple of weeks left this week for his home in Vancouver.

Mrs. M. J. Elliott and Charlie Tighe left Saturday to spend a few days in the Diabary district with the Garnet Tighe family before going on to Victoria, B.C. where they will reside in future. Mrs. Elliott has been a resident of Carbon since 1910, coming here from the east as a bride.

Mr. Harvey and Christina of Acme spent Friday in town renewing old acquaintances.

Mrs. McKibbin, Mona and Brian returned home Friday after spending a week at Champion visiting with Mrs. McKibbin's parents.

Mrs. Marilyn Hay is visiting with relatives at Red Deer.

Miss Gladys Little spent Friday in Calgary.

The Misses Pearl and Betty Kenny, and Kathleen Reid, accompanied by Mrs. Frank Emery left Friday for Turvey Valley. Mrs. Emery expects to return to Carbon this week end.

—FOR SALE—Two milk cows; one 18-month-old steer; one 14-month-old steer; one 7-month-old heifer. \$25 for the five head. Apply to E. J. Rouleau at The Chronicle Office.

—WANTED—Small pony, 42 to 46 inches high.—Hugh Brown, Carbon.

Mr. and Mrs. J. E. Gooder, Mrs. Pearson and Mr. Clarence Wall of Diabary were Carbon visitors last Thursday.

Our mailing list has been brought up to date and if the label on your paper does not show October 1944, you are in arrears. As The Chronicle will change hands on November 1st, we ask all those who owe for their paper, or other accounts, to kindly make a settlement immediately.

EVERYBODY WELCOME!

Despite the fact that Russian perennial wheat is a plant on the CIBC coast to coast network, it is not new. Russian plant breeders have, for many years, been investigating the possibilities of perennial wheats produced by crossing wheat with certain species of *Agropyron*, the grass to which couch grass, crested wheat grass, etc. belong. Canadian plant breeders, likewise, have produced perennial wheats from the same or similar crosses; but they are not optimistic about the prospect of producing a commercially desirable perennial milling wheat.

In an article such as this it is impossible to deal adequately with the technical problems involved. Aside from the perennial habit and, perhaps a measure of drought resistance, practically all the characteristics we require in our milling wheats are to be found in hard red spring varieties. The claims of producing a high quality perennial by crossing wheat with *Agropyron* is so remote that we may dismiss it. Hybridity thus produced belong to a species quite distinct from both parents. Crosses between the new hybrids and our standard varieties from highly sterile and, again, the prospect of success is remote.

It is to say that perennial wheat is probably in commercial production in Russia. It is a fairly good wheat, but at best it will require plenty of time and money.

## The sugar situation is NOT sweet

FOUR-FIFTHS OF THE SUGAR CANADA CONSUMES HAS TO BE IMPORTED

This map shows where Canada, Great Britain and the United States get their sugar in the good old days of peace. Our three countries take practically all the exportable sugar from these major sugar-exporting areas.

But supplies have either been cut off by enemy occupation of the country—as in the case of Java and the Philippines, or their production radically reduced by shortage of workers, as in the case of Hawaii, Porto Rico, Australia, Trinidad, Fiji.

The war has brought some unusual demands on the United Nations' sugar pool. Last quantities have been taken for making industrial alcohol used in the manufacture of synthetic rubber (tires, etc.) as well as T.N.T. and smokeless powder. For instance, the explosive to fill five 16-inch shells requires as much sugar as

Even the production of beet sugar in Canada and the United States has been drastically cut by labour shortage. In both countries the '43 sugar beet crop was forty per cent less than in '41. The only country to show an important increase is Cuba, where output had for years been deliberately restricted. But its increase has not been sufficient to offset the losses elsewhere—let alone meet the increased demand.

ROLLING ON SUGAR  
is produced on an acre of the finest sugar land. This year Cuban sugar alone used for making industrial alcohol will equal Canada's normal sugar imports for more than two years.

DO WE NEED MORE SUGAR?  
A century ago the whole world didn't consume as much sugar as Canada does today. Our sweet tooth has been acquired in quite recent times. Sugar rates high for its energy value, but starchy food is a good substitute.

THE SUPPLY IS SHARED  
All sugar supplies are pooled and under the control of the Combined Food Board of the United Nations, which allows supplies to Canada, United States and Great Britain on a uniform basis.

WE'RE LIVING ON OUR SUGAR CAPITAL  
At the time of "Pearl Harbor" the United Nations had a reserve stockpile of about 3 million tons, but for the last 3 years we've been using more than has been produced—our shipping heavily

into "reserve." Liberated nations will have to dip in too. Extra good crops could improve the situation, but greatly increased supplies are not in sight. If current consumption keeps up, we could be very short of sugar next year. We must do the utmost to conserve our supplies.

RATIONING WAS STARTED BECAUSE OF SHORTAGE OF SHIPS. IT MUST BE CONTINUED BECAUSE WORLD STOCKS ARE DEFICIENT! THIS IS ONE OF A SERIES OF ANNOUNCEMENTS GIVING THE FACTS ABOUT THE SUPPLY SITUATION OF VARIOUS WIDELY USED COMMODITIES

THE WARTIME PRICES AND TRADE BOARD
